FLOOR TO CEILING PARTITIONS

Glass partitions have complemented Global Israel's office furniture business for twenty years, with customers such as Intel and others enjoying the Teknion panels we installed over many years.

This field gained momentum over the past three years, with Global Israel beginning full local production of Glass partitions. As with the furniture so with the partitions, flexibility, short supply times, operational capability and competitive prices, are an advantage that proves itself every month as demonstrated in a steep upturn in the partition sales graph.

Over the past year the partitions department is managed as a separate unit by experienced managers with extensive experience in the Israeli market.

INDEX

PORTABLE ACOUSTIC PARTITIONS

DORMA is the leading company in the field and has a subsidiary in the U.S. (MODERNFOLD) and in Canada (SKYFOLD).

The company’s headquarters and European plant are located in northern Germany and provide services to EMEA countries, including Israel. The acoustic panels market is very large and has gained significant momentum in recent years. Many companies have already recognized the benefit of properly addressing acoustics while reducing the “constant echo”, the reverberation, which significantly improves the effectiveness of workers and those using work spaces and halls. The range of acoustic solutions continues to expand, resulting in significant market growth. d installation, up to final project completion.
